2020

Agenda

- Intro to custom Layers and LayerViews in JSAPI 4.x
- Examples and demos
- Deep dive into a custom visualization for a 2D MapView

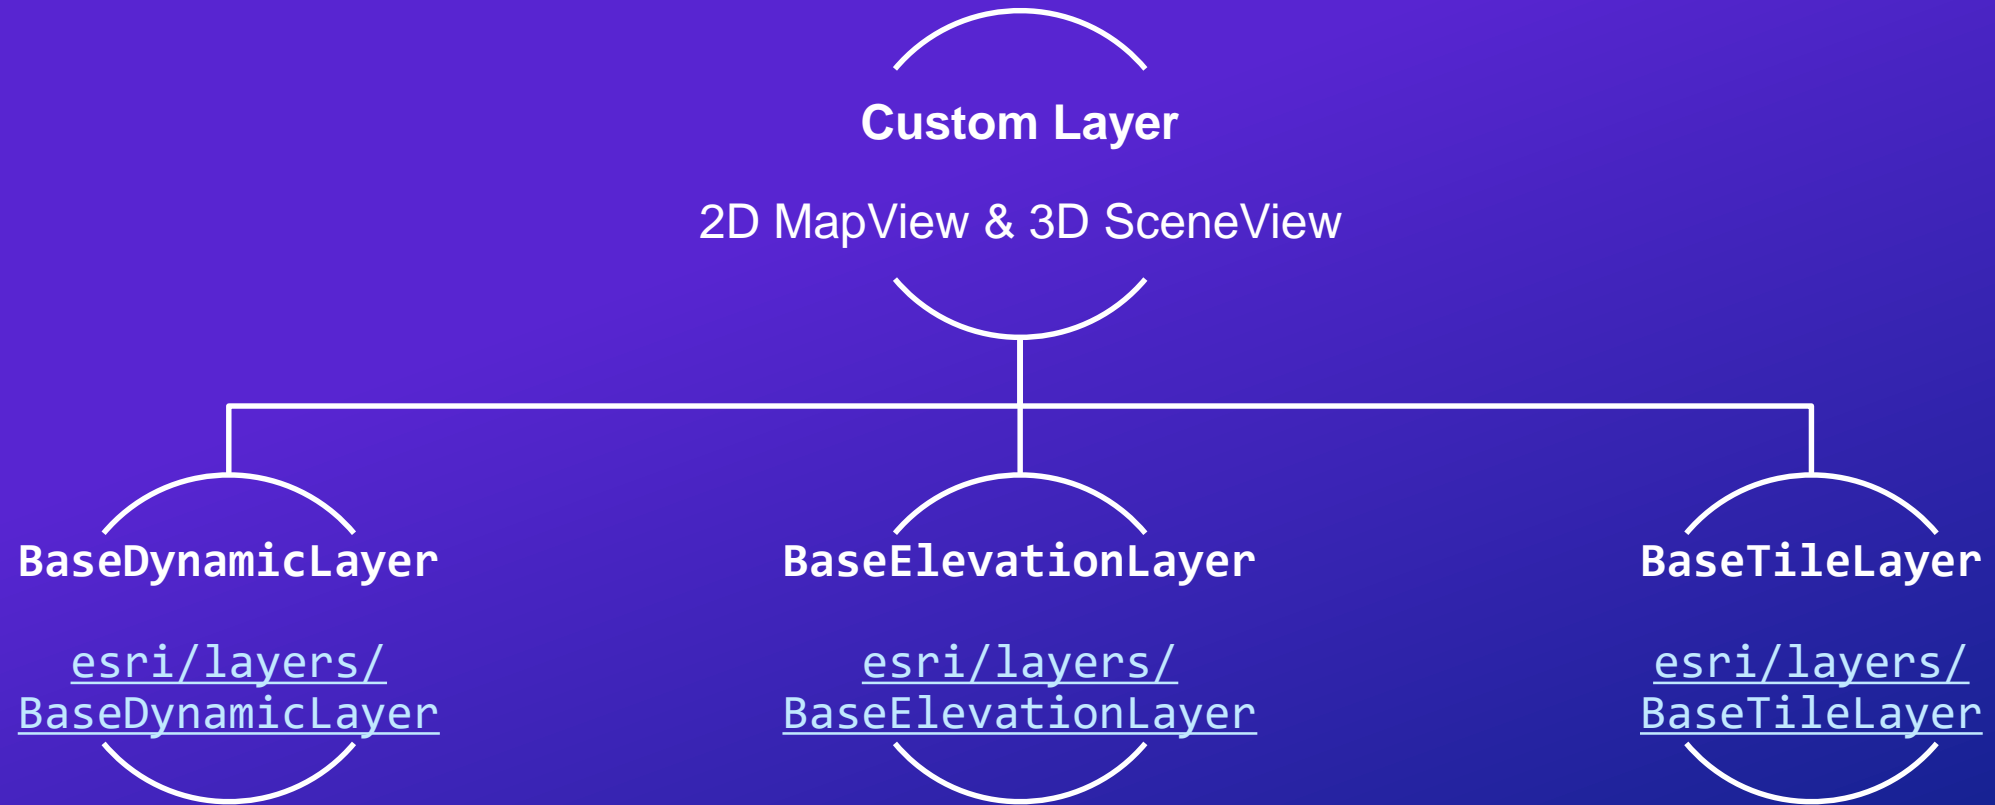

Finding Our Way

Where to begin making custom Layers and Layer Views

1. Extending JSAPI 4.x with a custom “Layer”

1. Extending JSAPI 4.x with a custom “Layer”

- 2D MapView or 3D SceneView
- Why create a custom layer?
 - Connect to a service not supported (yet) by the JSAPI
 - Manipulate data client-side before it is displayed in a 2D MapView or 3D SceneView
 - Mash up multiple services to create new visualizations
- Limitations
 - Suited for static content
 - No control over when it redraws
 - Limited to image formats and tiles

2. Extending JSAPI 4.x with a custom “LayerView”

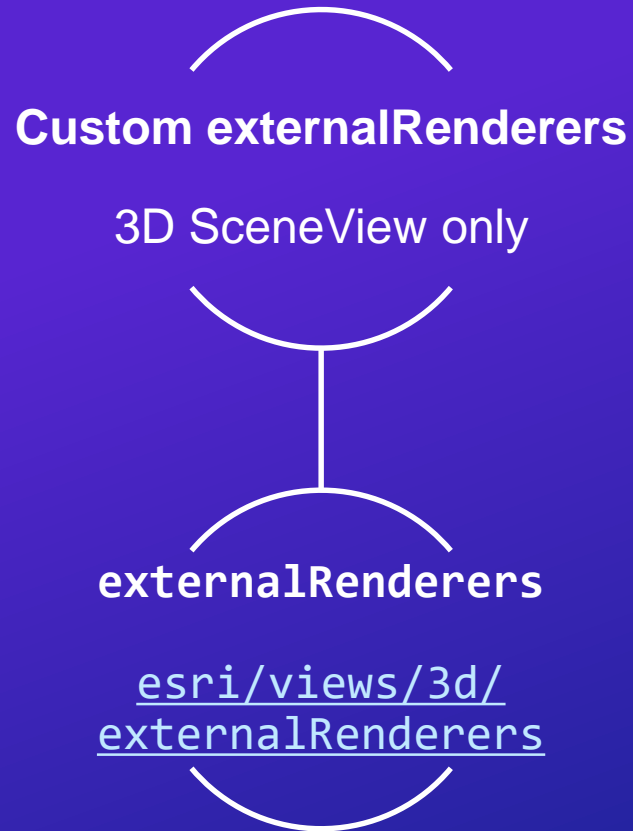

2. Extending JSAPI 4.x with a custom “LayerView”

- 2D MapView only
- Represents the ***view*** of a Layer after it has been added to a Map
- Responsible for calling a Layer’s API to get data and draw it
- Canvas API or WebGL API is exposed to draw anything you want in a 2D MapView
 - Why? There are no longer HTML nodes representing your geographical features.

3. Extending JSAPI 4.x with custom “externalRenderers”

3. Extending JSAPI 4.x with custom “externalRenderers”

- 3D SceneView only
- WebGL API is exposed to draw anything you want in a 3D SceneView
 - Why? There are no longer HTML nodes representing your geographical features.

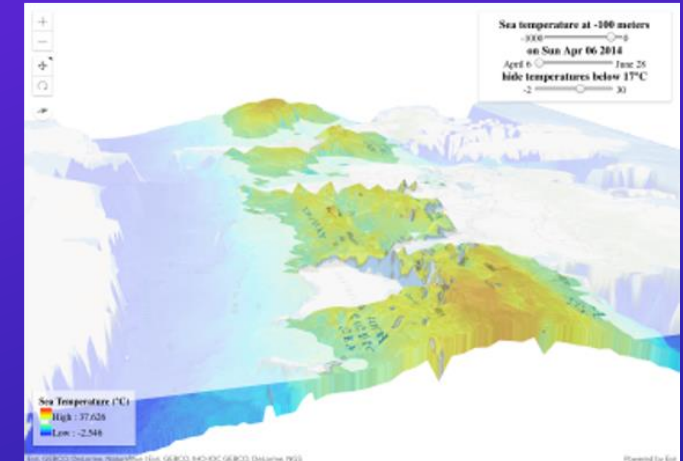

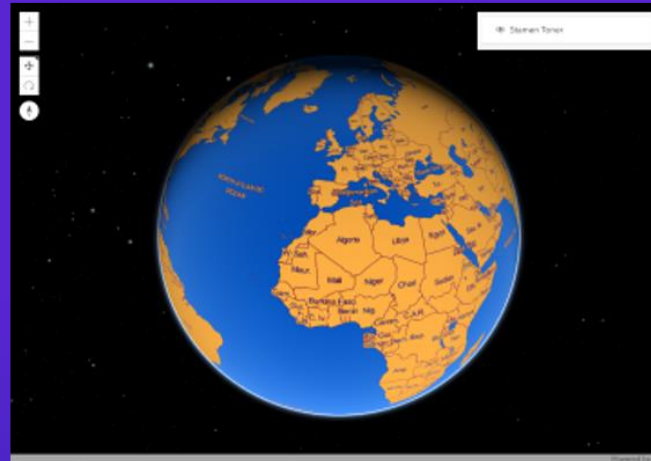

Demos & Code

Enough words, we want more pictures

Examples of what's possible: <https://esriurl.com/jsCustomLayers>

Demo

A deep dive into making a custom and animated **BaseLayerView2D**

1. Review a simple GraphicsLayer
2. Create a static BaseLayerView2D
3. Animate it!

<https://github.com/jwasilgeo/esri-experiments>

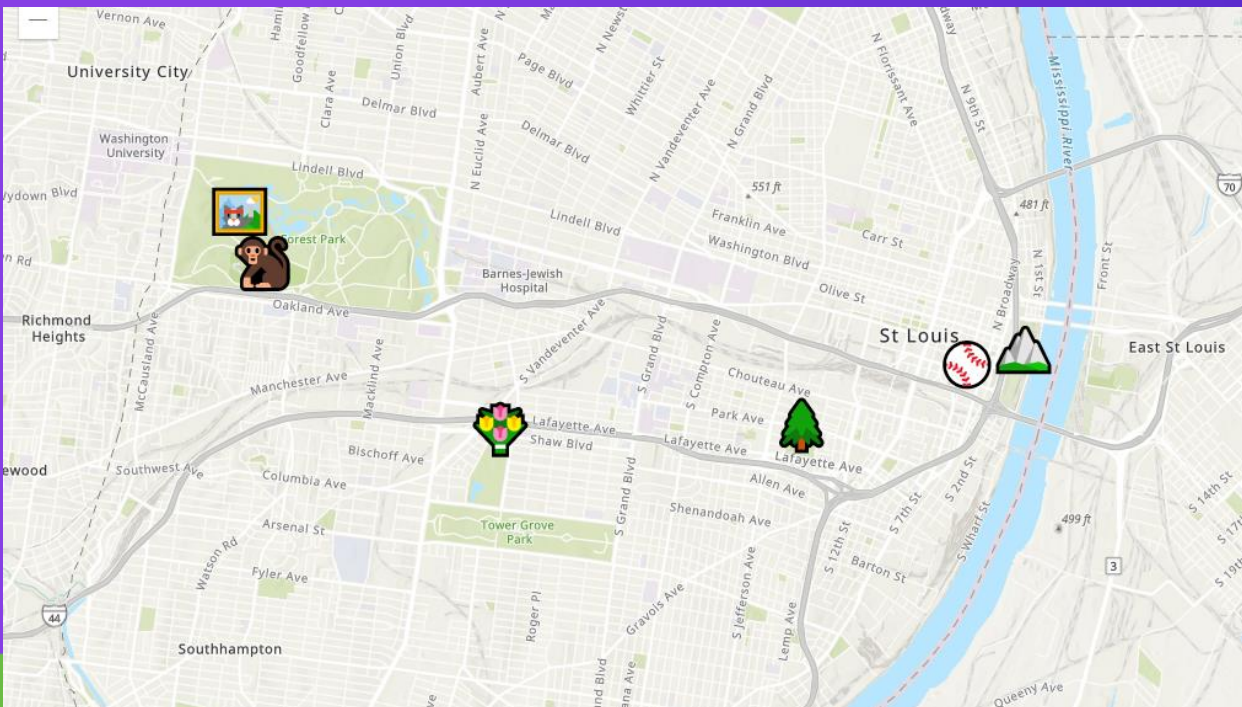

Demo

A custom **BaseLayerView2D** made
by *Sean McGee (Esri UK)*

<https://codepen.io/smcgee/pen/KKpKPxW>

[@HertsWestUK](https://twitter.com/HertsWestUK)

Demo

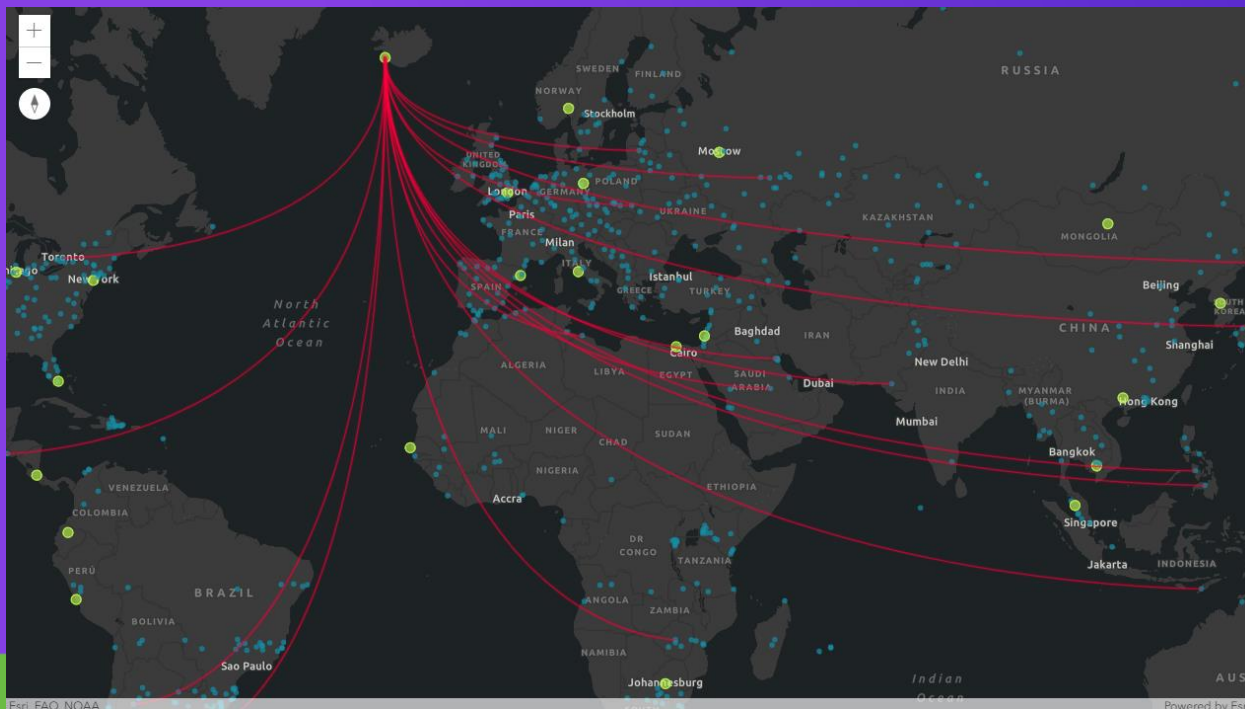

A custom `BaseLayerView2D` made
by *Gavin Rehkemper*

<https://gavinr.github.io/emoji-map-layer/>

[@gavinrehkemper](https://twitter.com/gavinrehkemper)

<https://github.com/gavinr/emoji-map-layer/blob/master/EmojiLayer.js>

Demo

“Canvas-Flowmap-Layer”

A custom **BaseLayerView2D** made
in collaboration with *Sarah Bell*

@sarahbellmaps

<https://github.com/sarahbellum/Canvas-Flowmap-Layer>

Demo

A custom `BaseTileLayer`

<https://github.com/jwasilgeo/esri-experiments>

Demo

“Earth at Night, Mountains of Light”

Built with a custom
BaseElevationLayer
